## LANGUAGE LAB

A language laboratory (or language lab in short) is a system that transforms a passive language class into an active speaking-based learning environment. This helps the language teacher to save a substantial amount of time and manage their language classes more efficiently. For students this means that they can spend more time on speaking-based language learning activities and actually using the target language. Usually when using language laboratories, the teaching focus shifts to using audio-visual teaching aids instead of teaching the second language through text-books and grammar rules.

At GJIMT well equipped language lab is installed to enhance language abilities of students across management and IT department . Hence BBA, BCA, Bcom.Hons, MBA & MCA students are able to improve functional English to have better career opportunities.
